With Ripple not mineable it is up to Litecoin and Monero to fight for the miners' interest and Monero is doing much better lately when compared to Litecoin (ASIC mineable).

Even with the availability of the new Innosilicon A4 ASICs being available for a while the interest in mining Litecoin hasn't picked up much.. So when you're trying to check how much a HashFlare contract would give you in a year, most likely others would show you very high and unrealistic returns.

Monero (XMR) has been rising up lately in terms of price and user interest and lately it even started rivaling the total market capitalization of Litecoin (LTC) as well as Ripple's (XRP).. Why Was This Created? There are a lot of calculators out there already, but I couldn't find one that allowed me to calculate compounded reinvestments. Lastly, to be honest, I also wanted a way to get by creating a tool that people may find helpful:) - Benjamin.. Nov 7, 2017 - At Bitcoin Cloud Mining you can find a detailed list and reviews of as many cloud mining providers as we can find.. This is a blog for crypto currency miners and users of Bitcoin (BTC), Litecoin (LTC), Ethereum (ETH), ZCash (ZEC) and many others.. Monero (XMR) is gaining more interest however and people are getting back to mining it and trading it even more with new big exchanges such as Kraken adding XMR trading pairs as a result of the huge boom in the exchange rate of the altcoin.. If you find helpful and useful information you can support us by donating altcoins or Bitcoin (BTC) to:

1AxbMZwtcmCByrHiaWwhse5r6ea1YgBwk1 ETH: 0x8d785ff337046444d8afbac169bcb7c0adfb3266 - LTC:

LPYFPK7dL1uEtwrAteLmxs7w8Je446gAAJ - ZEC: t1gg5rWxeMBMsyDRMrq5PJdFLiWQ86LGggi.. If you are interested in mining Monero and it is a coin you are still not very familiar with, then you can check a website dedicated for benchmarks with different hardware and miners to see what works best and what you can expect from your hardware.. Also, their calculations are not precise since they assume that the mining difficulty doesn't change over time, the Bitcoin to USD price remains the same, and they also do not minus maintenance fees.. Read the reviews before HASHFLARE INTRODUCTION HASHFLARE is a new range of cloudmining services brought to you by the HashCoins team of cryptomining experts. 0041d406d9 [Ti Nspire Cas Studenten-Software-Seriennummer](#)
